

My name is Sapna Mukherjee, MD and I am the founder of Premium Care Pediatrics (Premium Peds) - the area's first and only house-call based pediatrics practice.

About Premium Care Pediatrics -

As we all know, taking children to the doctor is no fun. It's inconvenient, always takes more time than it should, and everyone leaves cranky! Premium Peds is going to change all of that.

We are a full service pediatrics practice that offers only house calls – there is no office! This means convenient appointments that work with your schedule in the comfort of your home. This means unhurried appointments that are focused on your child's health and not on the office schedule. This also means no waiting room for your child to be exposed to other illnesses. With no office staff you always get to talk directly to me – day or night. Unless I'm seeing a patient, I will answer my phone when you call. I am available by text and email as well. Many times, a picture of a rash can help make the diagnosis right over the phone or can help determine if a cut needs stitches. While most traditional practices have 2,500 or more patients per doctor, we will limit our practice size to about 100 families. This ensures that I will personally get to know your family and provide the highest quality, customized pediatric care.

About me –

I grew up in Chicago and recently moved from the city to Glencoe with my husband, Dev. We have a 3 ½ year old son named Rohan and our daughter, Bryn, is just turning one. Our sunny kitchen and family room definitely get a workout and we have been enjoying our backyard and the beautiful beach as well! My education and training has all been in the Midwest – BA at the University of Chicago (1993), MD at University of Illinois (1997). I completed my Pediatrics residency at Children's Hospital and Medical Center of Cincinnati and then came back to Chicago in 2000. I worked for 10 years in large Pediatric Emergency Departments in the city and then 2 more years at a busy private practice in the Gold Coast. I am currently on staff at Lurie Children's and Lake Forest Hospitals and will be on staff at Evanston and Highland Park Hospitals very soon.

My Philosophy -

After having worked for the last several years, and certainly after becoming a mom, I realize that so much of pediatrics is about preventing illness and maintaining good health. I use a practical, common sense approach and have learned to pick my battles – you don't have to eat veggies at every meal but we do have to brush our teeth every single night! Fortunately, children are generally healthy. However, when they are sick, it can be stressful and hard on the whole family. My job is to partner with you to diagnose the problem as quickly as possible and create a treatment plan that is medically sound and customized for your child. I am always only a phone call away ensuring prompt attention to your child's health. I will be checking in with you frequently to see how things are going and make adjustments to our plan as needed, thereby optimizing your child's care.

I am excited to return to a more personalized way to care for children. Premium Care Pediatrics is great choice for busy families, large families or families with special needs. Please call me at 847-447-6997 to learn more about Premium Care Pediatrics and how we can make your child's healthcare about your child again.

Be well, Sapna
